

When responding to a domestic violence call, warrant search, or planned raid, officers never fully know what to expect. Quick, decisive action is needed to protect the public and resolve the threat. At night, better lighting lets officers see critical details and help them make better decisions.

1

Nomad® 360 P/N 200-900

Self-contained tripod light provides overhead flood lighting in seconds. Bright illumination at potential exit points allows officers to monitor all exits and gives the suspect less hope of being able to sneak away. Two lights positioned correctly can cover the entire exterior of a building. [Learn more.](#)

2

Nomad® Prime P/N 200-800

On the spotlight setting, this light acts as a tactical wall of light, which protects officers and gives SWAT a tactical advantage as they can see but not be seen. [Learn more.](#)

The need for lighting doesn't stop when officers enter a building. Situational awareness is critical, and having the right tools on hand to react as quickly and safely as possible is a must.

3

T.E.D.D. P/N 750-500

Tactical Electronic Distraction Device

Use the T.E.D.D. as a flashbang alternative for tactical situations in which a flashbang is dangerous. Strobing light and 120dB sound distract and disorient in a non-lethal way. This is useful in situations with innocent bystanders or explosive materials. [Learn more.](#)

4

Taker B50 Shield Light P/N 500-331-G

Enter the room with a Taker B50 Shield Light for immediate situation assessment. Turbo-Strobe mode disorients and distracts suspects so officers can respond faster and eliminate the threat. [Learn more.](#)
