# COLD? WET? WINDY?

**FEAR NO ELEMENT™**

WILD THINGS LAYERING SYSTEM  
KEEPS YOU WARM, DRY,  
AND SAFE.

# WILD THINGS GEAR: LAYERS DESIGNED TO KEEP YOU WARM AND DRY IN THE WORST ENVIRONMENTS

We have tested all the layers in various configurations to put this guide together. The chart to the left tells you what to wear in different temperature ranges, different precipitation, and different activity levels. The table below shows that each combination of layers provides over 8-hours of protection before a user is susceptible to injury from cold. Stay Warm. Stay Dry. Stay Safe. Fear No Element.

# STAY WARM, STAY DRY

Wild Things has over 40-years of cold, wet, and windy weather experience. Our gear is thoroughly tested and vetted. Follow this guide to select the right layers for your challenge. Fear No Element.

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### BASE LAYER

These expedition-weight base layers move moisture away from the skin and dry quickly, providing just the right balance of insulation and moisture management. Four-way stretch and an athletic fit allow these base layers to move with you. Use them for lightweight warmth during high energy, cool weather activity as part of an expedition-weight base layer system.

#### POWER STRETCH® PULLOVER & PANT

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### ACTIVE FLEX LAYER

The Active Flex hybrid soft shell was designed with the mobile warrior in mind. Using Climashield Apex advanced insulation bonded to a quick drying stretch liner, the Active Flex works with you in the field. Durastretch soft shell exterior is treated with DWR and Near-IR for ultimate protection. The Active Flex provides tremendous performance in any setting. Exceptional breathability prevents moisture build-up making it a perfect option on its own or an essential piece to any layering system.

#### ACTIVE FLEX JACKET

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### WIND LAYER

Breathable wind layers provide exceptional protection from wind and rain making it an excellent lightweight emergency shell. Generous enough to pull over a mid-layer, but fitted enough to keep the wind out.

#### WHITE OUT OVERWHITE® JACKET & PANT

#### WINDSHIRT & WIND PANT

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### SOFT SHELL LAYER

Soft Shell is available in winter weight providing warmth and four-season protection, making it a great all purpose jacket, or lightweight for warmer operating ranges. Both feature four-way stretch nylon/spandex blended fabric treated with DWR to protect you from the elements. Winter weight shells are bonded to hydrophobic polyester fleece, maintaining the high stretch and memory characteristics of a soft shell, while adding the warmth and comfort of fleece.

#### SOFT SHELL JACKET & PANT

#### LIGHTWEIGHT SOFT SHELL JACKET & PANT

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### HARD SHELL LAYER

Hard Shell layers are specifically engineered to keep you and your gear dry while allowing complete access to kit. Made of 3-layer GORE-TEX® Military waterproof/windproof/breathable fabric, these technical hard shell layers remain light for quick movement. Fully seam sealed to ensure seams don't wet out, and blocking out the wind and rain.

#### HARD SHELL RESCUE JACKET & HARD SHELL PANT

**LAYER LEVEL**

1 2 3+ 4 5 6 7

### LOFT LAYER

Fully insulated, wind/water resistant layers for extreme cold conditions provide ultimate warmth across a broad operating range thanks to Low Loft and High Loft options. Both feature PrimaLoft® Silver Active synthetic insulation to provide warmth even when wet. Shells are made of 100% windproof ripstop nylon with DWR/NIR designed for insulation protection, abrasion and water resistance.

#### LOW LOFT JACKET

#### HIGH LOFT JACKET & PANT

**FR LAYER LEVEL**

1 2 3+ 4 5 6 7

### FR HARD SHELL LAYER

FR Hard Shell layers are specifically engineered to provide flame resistance while keeping you and your gear dry. Using Gore 2-Layer construction combining durably waterproof, windproof, and breathable GORE® Military fabric with PYRAD® flame retardant. GORE® PYRAD® technology minimizes burn injury, while offering a high level of thermal protection.

#### HARD SHELL RESCUE JACKET FR

#### HARD SHELL JACKET & PANT FR

**FR LAYER LEVEL**

1 2 3+ 4 5 6 7

### FR LOFT LAYER

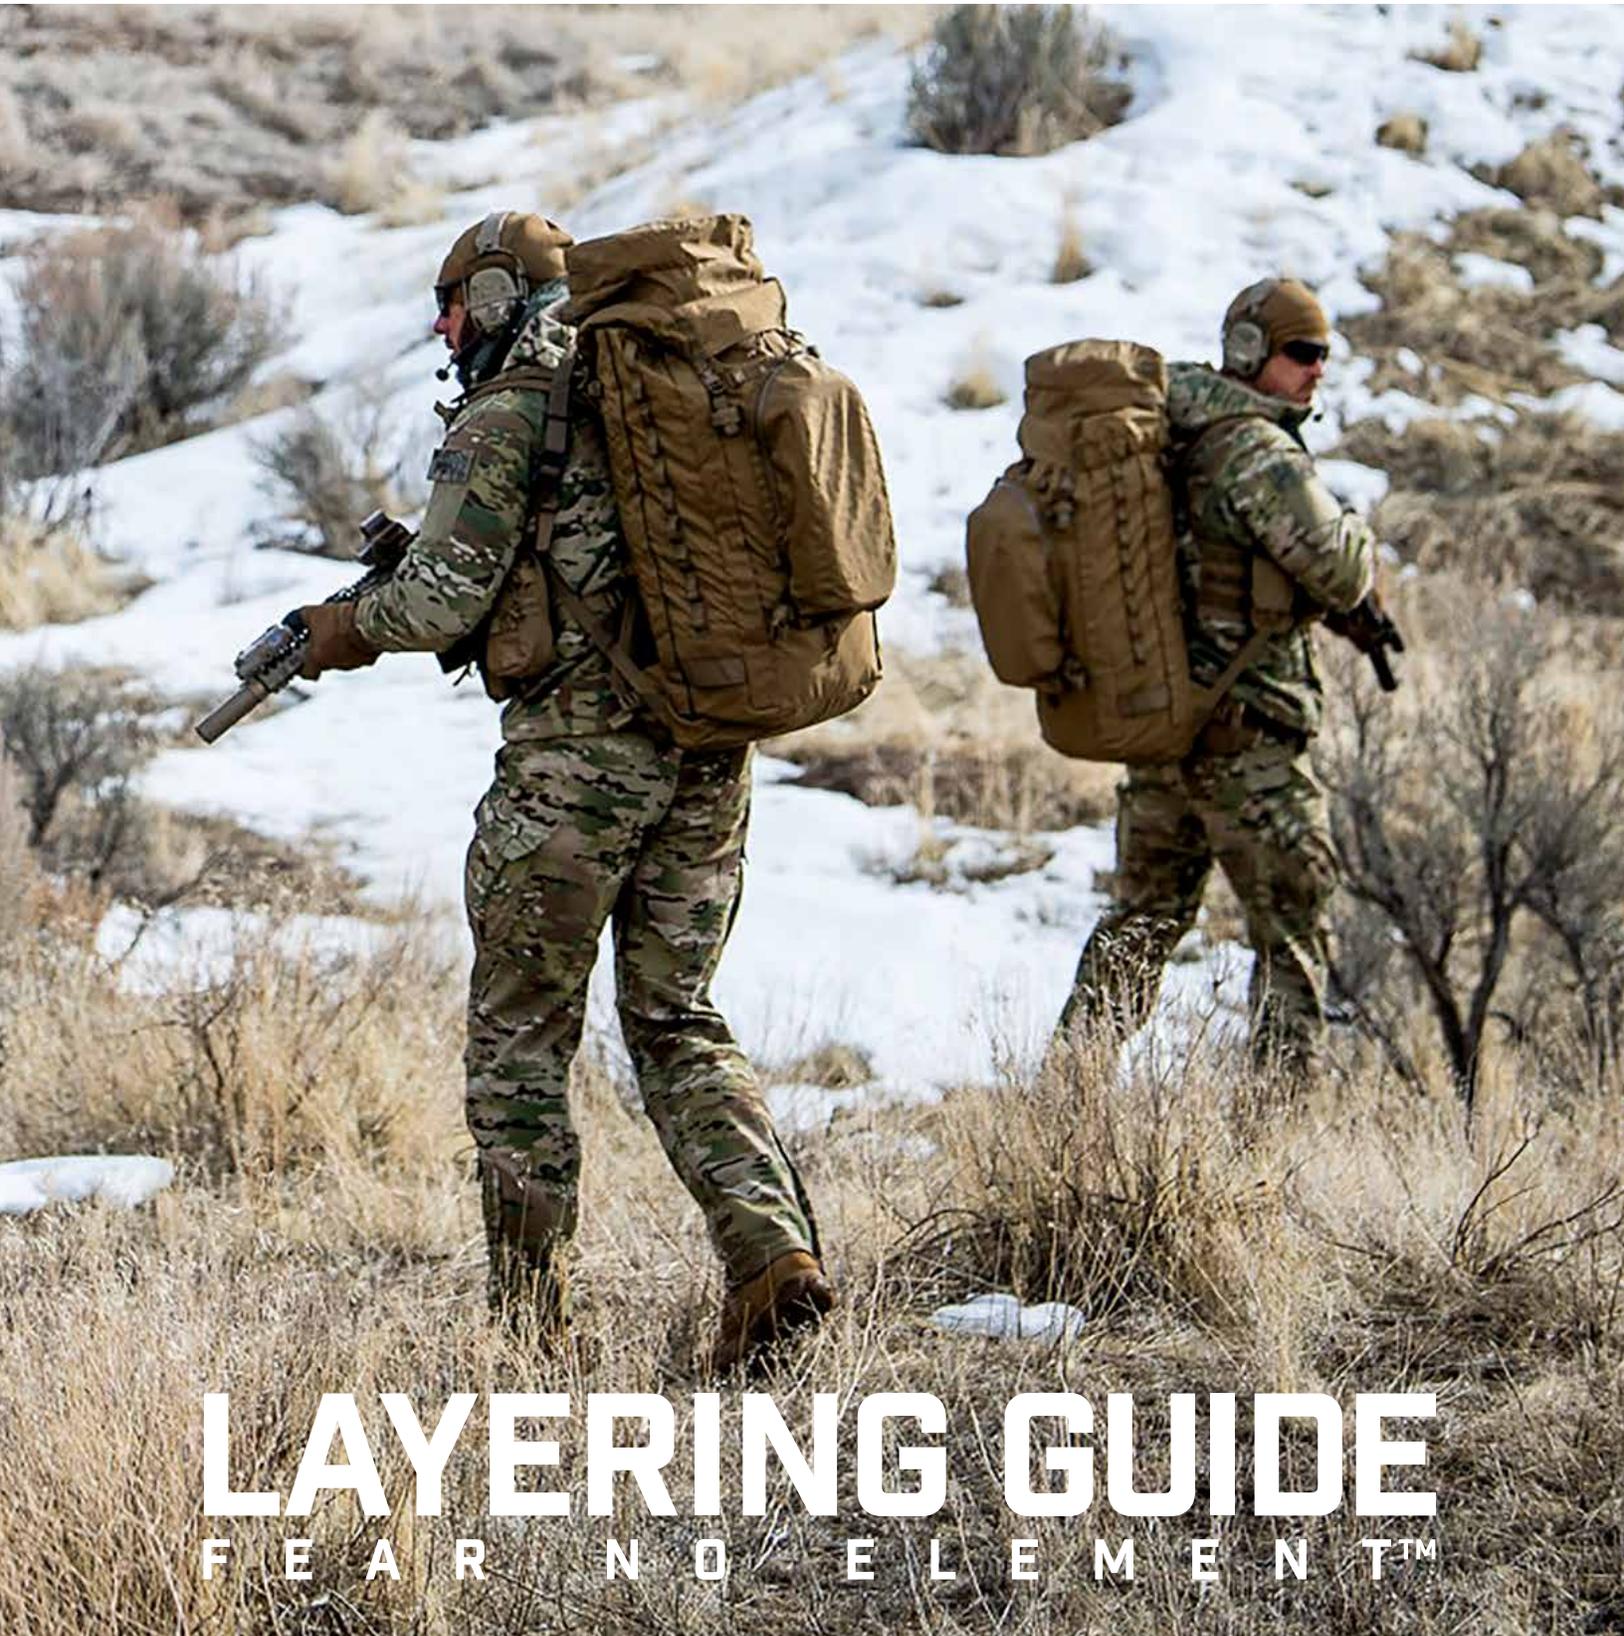

Fully insulated, flame/wind/water resistant layers for extreme cold conditions provide ultimate warmth across a broad operating range thanks to FR Low Loft and FR High Loft options. Both feature PrimaLoft® Silver Active synthetic insulation to provide warmth even when wet. Shells are GORE® PYRAD® - a lightweight, water resistant and breathable FR material. PYRAD® provides best-in-class FR protection without any sacrifice in cold/wet weather performance.
